

MICHAEL ALEXANDER JUSTIN AUDISON SIBARANI

DATA SCIENCE GRADUATE | BUSINESS INTELLIGENCE & DATA ANALYST

Jakarta 13440, Indonesia | michaelsibarani555@gmail.com | +6281361456188 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Science graduate with hands-on experience applying statistical analysis, data modeling, ETL, and analytical programming to business and operational datasets. Experienced in Python, SQL, and PostgreSQL, with projects spanning market analysis, customer analytics, clustering, and business intelligence. Skilled in translating analytical findings into decision-ready dashboards and actionable business insights.

AREAS OF EXPERTISE

- | | | | |
|---|--|--|--|
| • Business Intelligence: KPI Analysis, Market Analysis, Dashboard Development, Decision Support | • Data Engineering: ETL, Data Cleaning, Data Transformation, Data Modeling | • Data Science & Analytics: Exploratory Data Analysis, Statistical Analysis, Data Modeling, Customer Analytics | • Machine Learning: Clustering, K-Means, Hierarchical Clustering, scikit-learn |
|---|--|--|--|

PROFESSIONAL EXPERIENCE

Data Analyst - FOLU Net Sink 2030 Project, Biro Hubungan Masyarakat dan Kerja Sama Luar Negeri - Sekretariat Jenderal Kementerian Kehutanan Apr 2025 to Jun 2026

- Collected, cleaned, and consolidated 100,000+ multi-platform social media records and internal communication data into structured datasets supporting FOLU Net Sink 2030 communication monitoring and executive reporting.
- Analyzed sentiment trends, audience engagement, recurring public issues, and communication performance to generate actionable insights and identify strategic opportunities for communication planning.
- Evaluated public perception across key audience segments by identifying recurring themes, emerging issues, and engagement patterns to support stakeholder decision-making and performance evaluation.
- Prepared executive reports and presentation materials summarizing communication performance, key findings, recommendations, and strategic opportunities while collaborating with cross-functional stakeholders to improve reporting workflows.

Data Analyst Intern, PT. Monster Group Jul 2022 to Jan 2023

- Collected, cleaned, and analyzed performance data from **4 Instagram** and **4 LinkedIn** corporate accounts to evaluate audience engagement, content performance, and campaign effectiveness.
- Built interactive dashboards using **Python** and **Excel** to visualize social media KPIs, engagement trends, audience insights, and content performance for the Digital Marketing team.
- Conducted social media performance analysis by identifying high-performing content, audience behavior, and engagement patterns to support content strategy and future marketing initiatives.
- Presented analytical findings and actionable recommendations through executive-ready dashboards and reports, enabling data-driven decision-making across the Digital Marketing team.

PROJECTS

E-Commerce Power Shift — E-commerce Market Position Analysis *Python · SQL · PostgreSQL · React*

- Built an end-to-end analytical pipeline analyzing **Shopee vs Tokopedia-related market-position shifts in Indonesia**, including structural-break handling for the 2025 market change.
- Developed a validated **Python + PostgreSQL analytical layer** powering an interactive React dashboard, with explicit handling of observed, derived, unknown, and scenario values.

RetailIQ — Executive Retail Analytics Dashboard *Python · Pandas · PostgreSQL · SQL · React*

- Built a complete **ETL and BI pipeline** transforming raw retail transactions into analytical datasets covering revenue, customers, products, stores, geography, and categories.
- Designed a **PostgreSQL analytical layer and interactive React dashboard** with multidimensional filtering and executive KPI reporting.

Customer Retention Intelligence — Churn & Risk Analytics *Python · SQL · React · TypeScript*

- Developed a customer churn analytics pipeline using **Python and SQL** to identify high-risk customer segments and key churn patterns.
- Built an executive dashboard translating churn analysis into **customer risk, retention, and business-impact insights**.

FOLU Executive Intelligence Dashboard *Python · React · TypeScript · Next.js*

- Built an executive intelligence dashboard analyzing **sentiment, campaign performance, platform trends, and communication risks** for FOLU Net Sink 2030.
- Transformed multi-dimensional communication data into **interactive KPI, trend, and risk-monitoring views** for executive decision support.

EDUCATION

Universitas Pembangunan Nasional “Veteran” Jawa Timur

Mar 2020 to Oct 2024

Bachelor Of Data Science

- GPA: 3.82/4.00** | **Thesis:** *Pengelompokkan Data Persediaan Obat Menggunakan Metode K-Means dan Hierarchical Clustering*
- Publication:** *Penggunaan K-Means dan Hierarchical Clustering Single Linkage dalam Pengelompokkan Stok Obat* - Published in a SINTA 3 Accredited Journal.
- Certification:** **Junior Web Programmer** - Badan Nasional Sertifikasi Profesi (BNSP), 2022.

TECHNICAL PROFICIENCIES

- | | |
|--------------------------------|--|
| Programming: | Python, SQL, R, TypeScript |
| Data & Analytics: | Pandas, NumPy, scikit-learn, Exploratory Data Analysis, Statistical Analysis |
| Databases: | PostgreSQL, MySQL, MongoDB |
| BI & Visualization: | Power BI, Tableau, Excel, Looker Studio, Matplotlib, Dashboard Development |
| Web & Tools: | React, Next.js, Git, REST APIs, Vite |
